International cooperation & Research focus

The focus of the research work carried out by the University of Split is on scientific areas with reference to disciplines characterized by natural, biomedical, cultural, historical, social, economic and other features of the region as a part of the Croatian Adriatic and the Mediterranean region as a whole.

This involves the research and protection of, among others

- Art and Construction Heritage
- Philology
- Field Crops
- Oceanography and Fishing
- Adriatic Botany and Zoology
- Island and Coastal Economy
- Adriatic Tourism
- Maritime Law
- Nautical Science
- Naval Architecture.

More information on scientific topics that the researchers at the University of Split work on can be found here:

<https://www.unist.hr/scientific-topics/16616>

In the framework of European projects, contacts have been made with the leading European universities, but also with universities from other continents.

English taught study programmes

Among others, the following programmes are taught in English:

- Bachelor level: Computing
- Master level: Environmental Physics
- Master Level: Astrophysics and Elementary Particle Physics
- All English taught programmes can be found via: <https://www.unist.hr/en/education/studies-in-english/about-studies-in-english>

Infrastructure

The University of Split hosts the following University Departments:

- Marine Studies
- Professional Studies
- Forensic Sciences
- Health Studies

As a central point for connecting science and the industry and a starting point for finding partners in the industry who need the knowledge and research-analytical capacity of the University, a Technology Transfer Office is run. In 2020, the SPINIT Incubator was opened with the aim of developing entrepreneurial infrastructure.
